PROFILE

I'm an Android developer who loves to make awesome apps that rock people's socks off!

My educational background in Computer Science, coupled with Google's official Android development training, has turned me into a badass ninja! I have also built several open-source projects that have been downloaded by thousands of users and showcase my expertise.

When I'm not slaying bugs, you can find me wandering around the internet and catching up with the latest trends.

SKILLS

Android
Kotlin
Git
Firebase
MVVM
JavaScript
Figma

EXPERIENCE

Android Developer on Upwork

Dec 2023-present

I'm a passionate freelancer on Upwork, excited to collaborate with clients and bring their app concepts to life, one pixel at a time.

Android Developer at Borhan Mobin

Jul 2022-Oct 2023

As the sole mobile developer at this company, I was responsible for creating an Android app that enabled online purchase of soccer tickets. The app was a smash hit, reaching more than 20,000 monthly active users in just a few months!

OPEN-SOURCE PROJECTS

Filester
SuperWebView

CERTIFICATES

Version Control with Git
